

Chemical Products Corporation SAFETY DATA SHEET

SDS No. 42A

Page 1 of 9 Pages

Approval date February 25, 2023

1. PRODUCT IDENTIFIER

Barium Chloride Solution

1.1 Trade Name: Barium Chloride Solution

Synonyms: Barium Chloride 20% Solution; Barium salt of hydrochloric acid

CAS Number: 10361-37-2 for Barium Chloride

1.2 Relevant identified uses of the substance or mixture and uses advised against.

Recommended industrial uses:

- the synthesis of substances,
- as a fluxing agent
- treatment of wastewater for removal of radium by co-precipitation

Industrial uses advised against: None.

1.3 MANUFACTURER/Supplier of this SDS:

Chemical Products Corporation
102 Old Mill Road SE
Cartersville, Georgia 30120-4127
Telephone: 1-770-382-2144

1.4 EMERGENCY PHONE NUMBER: CHEMTREC, 800-424-9300 (24 hours every day)

2. HAZARD IDENTIFICATION

2.1 Classification in accordance with paragraph (d) of §1910.1200

Acute toxicity, Oral (Category 4), H302

Acute toxicity, Inhalation (Category 4), H332

Serious eye damage/eye irritation (Eye Irritant Category 2A), H319

2.2 Signal word, hazard statement(s), symbol(s) and precautionary statement(s) in accordance with paragraph (f) of §1910.1200.

Signal Word

WARNING

Hazard Statements

- H302 Harmful if swallowed
- H332 Harmful if inhaled
- H319 Causes serious eye irritation

Precautionary Statements

Prevention

- P261 Avoid breathing dust/ fume/ gas/ mist/ vapors/ spray.
- P264 Wash skin thoroughly after handling.
- P270 Do not eat, drink or smoke when using this product.
- P280 Wear protective gloves/protective clothing/eye protection/face protection.

Response

- P301 + P310 IF SWALLOWED: Immediately call a POISON CENTER/doctor.
- P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
- P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- P321 Specific treatment (see supplemental first aid instructions on this label) - **Physician:** Administer potassium intravenously to counteract the effect of barium.

2.3 Other hazards not otherwise classified that have been identified during the classification process

- None known.

3. COMPOSITION / INFORMATION ON INGREDIENTS

<u>COMPONENT</u>	<u>CAS #</u>	<u>EXPOSURE LIMITS</u>	<u>% BY WT</u>
Barium chloride	10361-37-2	OSHA PEL: 0.5 mg/cu m as Ba 2.5 mg/cu m as This Product ACGIH TLV-TWA: Same	18-22%
Water			78-82%

4. FIRST AID MEASURES

4.1 Description of necessary first-aid measures

If swallowed

Rinse mouth with water. Give Epsom salts (magnesium sulfate) or Glauber's Salt (sodium sulfate) dissolved in water. Get medical attention immediately and contact a poison control center. Induce vomiting immediately, as directed by medical personnel. Never give anything by mouth to an unconscious person.

If inhaled

Move person into fresh air. If not breathing, give artificial respiration. Get medical attention immediately and contact a poison control center.

For eye contact

Flush eyes with large amounts of water as a precaution and get immediate medical attention.

For skin contact

Take off contaminated clothing and shoes immediately. Wash off with soap and plenty of water. Consult a physician if irritation persists.

4.2 Most important symptoms and effects, both acute and delayed

In case of inhalation

- irritating/corrosive to mucus membranes in the respiratory tract with possible delayed effect of barium absorbed into the bloodstream

In case of eye contact

- physical abrasion of the eye may occur in addition to damage resulting from dissolution.

In case of skin contact

- irritating to skin

In case of ingestion or inhalation

- In case of ingestion, acute overexposure will cause severe abdominal pain, violent purging with watery and bloody stools, vomiting, muscle twitching, hypertension, and confusion, followed by transient muscle paralysis including potentially fatal paralysis of the respiratory muscles.

4.3 Indication of any immediate medical attention and special treatment needed, if necessary

- seek medical treatment if you feel unwell after being exposed to this product.

- **Physician:** Administer potassium intravenously to counteract the effects of barium.

5. FIRE FIGHTING MEASURES

5.1 Suitable (and unsuitable) extinguishing media.

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Flashpoint: Non-Flammable.

Flammability: Non-Flammable.

Autoignition: Non-Flammable.

5.2 Specific hazards arising from the chemical (e.g., nature of any hazardous combustion products).

No hazardous combustion products. Product is harmful if swallowed or inhaled.

5.3 Special protective equipment and precautions for fire-fighters.

No special equipment is required, but personal protective equipment and self-contained breathing apparatus should be used as a general precaution. Wash away any of this product which may contact the body, clothing, or equipment. Limit water runoff if it is likely to contain this material.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment, and emergency procedures.

Avoid generating dust. Use appropriate Personal Protective Equipment (PPE) as described in Section 8. Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Spilled product could be a RCRA D005 characteristic hazardous waste because of its soluble barium content. Do not dump into sewers, on the ground, or into any body of water.

6.2 Methods and materials for containment and cleaning up.

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed containers for disposal. For disposal see Section 13.

7. HANDLING AND STORAGE

7.1 Precautions for safe handling.

Avoid contact with skin and eyes. Avoid generation of dust and aerosols. Provide appropriate exhaust ventilation at places where dust may be generated.

7.2 Conditions for safe storage, including any incompatibilities.

This material is water-soluble. Keep it dry. Keep containers closed. Emptied containers may still contain harmful amounts of this material. No known incompatibilities.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1 OSHA permissible exposure limit (PEL), American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value (TLV)

OSHA PEL: 0.5 mg/m^3 as Ba equals 2.5 mg/m^3 of this product.

ACGIH TLV-TWA is the same as the OSHA PEL.

Remarks: Eye irritation - Muscular stimulation - Skin irritation

Gastrointestinal irritation. Not classifiable as a human carcinogen.

NIOSH IDLH (Immediately Dangerous to Life or Health Concentrations) is 50 mg Ba/m^3 equals 250 mg/m^3 of this product.

8.2 Appropriate engineering controls.

Control airborne concentrations below the exposure limits.
Use only with adequate ventilation.

8.3 Individual protection measures, such as personal protective equipment.

Use a NIOSH-approved dust mask if excessive mist or dust is present.
Cover exposed skin areas and wear general-purpose gloves.
Wear safety glasses. Use chemical goggles if excessive mist or dust is present.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance (physical state, color, etc.): Clear or slightly cloudy liquid
Odor: No data available. Expected to be odorless.
Odor Threshold: No data available.
pH: Approximately 7.0 at 25°C (77°F)
Melting point/Freezing point: No data available.
Initial boiling point and boiling range: No data available.
Flash point: No data available. Not flammable.
Evaporation rate: No data available.
Flammability (solid, gas): No data available. Not flammable.
Upper/lower flammability or explosive limits: No data available. Not flammable
Vapor pressure: No data available.
Vapor density: No data available.
Relative density – Specific Gravity: about 1.2 g/cm³
Solubility: Infinite
Partition coefficient: n-octanol/water: No data available.
Auto-ignition temperature: No data available.
Decomposition temperatures: No data available.
Viscosity: No data available.

10. STABILITY AND REACTIVITY

10.1 Reactivity

Not reactive with air or water. Hygroscopic.

10.2 Chemical Stability

Stable under recommended storage conditions.

10.3 Possibility of Hazardous Reactions

No data available. No known hazardous reactions.

10.4 Conditions to avoid (e.g., static discharge, shock, or vibration)

No data available.

10.5 Incompatible materials

No data available.

10.6 Hazardous decomposition products

No data available. Decomposition under normal conditions does not occur.

11. TOXICOLOGICAL INFORMATION

11.1 Information on the likely routes of exposure (inhalation, ingestion, skin and eye contact)

Skin: Contact may be slightly irritating. Barium ion is not expected to pass through intact skin.

Eye: Any mist generated is expected to be slightly to moderately irritating.

Ingestion: The Oral LD₅₀ values for male and female rats were found to be 419 (352-499) and 408 (342-487) mg/kg BaCl₂, respectively (Borzelleca, et al.). A National Toxicology Program study found no decrease in two-year survival for rats consuming 110 mg/kg/day for the entire two year period (lifetime exposure).

Inhalation: No studies. Inhaled mist or dust is expected to exhibit the same systemic toxicity as ingestion as barium chloride is cleared from the lungs into the bloodstream.

11.2 Symptoms related to the physical, chemical and toxicological characteristics

Serious eye damage can result from exposure. Acute ingestion overexposure will cause severe abdominal pain, violent purging with watery and bloody stools, vomiting, muscle twitching, hypertension, and confusion, followed by transient muscle paralysis, including potentially fatal paralysis of the respiratory muscles. Barium is eliminated from the body over several days.

11.3 Delayed and immediate effects and also chronic effects from short- and long-term exposure

A National Toxicology Program study found no decrease in two-year survival for rats consuming 110 mg/kg/day of barium chloride for the entire two year period (lifetime exposure).

Sub-chronic: Rats and mice exposed to 1,250 ppm of barium chloride dihydrate in their drinking water continuously for two years showed no adverse effects.

Chronic/Carcinogenic: Rats and mice exposed to 2500 ppm of barium chloride dihydrate in drinking water for two years showed no evidence of carcinogenic response.

Teratogenic: Rats exposed to 2000 ppm of barium chloride dihydrate in their drinking water for thirty days exhibited no teratogenic effects, and no fetotoxicity was noted.

Reproductive: No effects were seen on reproductive indices in a mating trial after male rats were exposed to 2000 ppm of barium chloride dihydrate in their drinking water for sixty days and female rats were exposed to 2000 ppm in their drinking water for thirty days.

11.4 Numerical measures of toxicity (such as acute toxicity estimates)

LD₅₀ values for male and female rats were found to be 419 (352-499) and 408 (342-487) mg/kg BaCl₂, respectively (Borzelleca, et al.).

Inhalation: No studies - Inhaled mist or dust is expected to exhibit the same systemic toxicity as ingested barium chloride.

Dermal: Contact may be slightly irritating. Barium ion is not expected to pass through intact skin.

LD₅₀ Intraperitoneal - Mouse - 51 mg BaCl₂/kg.

11.5 Whether the hazardous chemical is listed in the National Toxicology Program (NTP) Report on Carcinogens (latest edition) or has been found to be a potential carcinogen in the International Agency for Research on Cancer (IARC) Monographs (latest edition), or by OSHA.

Rats and mice exposed to 2500 ppm of barium chloride dihydrate in drinking water for two years showed no evidence of carcinogenic response.

IARC: No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

NTP: No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

OSHA: No component of this product present at levels greater than or equal to 0.1% is on OSHA's list of regulated carcinogens.

12. ECOLOGICAL INFORMATION

12.1 Ecotoxicity (aquatic and terrestrial, where available)

In turbid water at 20 °C, the 96 hour TLM is >9 g of this product/l for Mosquito Fish (*Gambusia Affinis*) based on BaCl₂ toxicity.

12.2 Persistence and degradability

Soluble barium chloride is expected to be precipitated by sulfate in the environment to yield insoluble barium sulfate.

12.3 Bioaccumulative potential

No data available. No appreciable bioaccumulation is expected.

12.4 Mobility in soil

No data available. When barium chloride reacts with environmental sulfate, insoluble barium sulfate is formed which is not mobile.

12.5 Other adverse effects

No data available.

13. DISPOSAL CONSIDERATIONS

Waste containing more than 0.2% soluble barium is hazardous under the RCRA criteria. If disposed of in its purchased form, this product would be a hazardous waste based on barium solubility in the RCRA TCLP test. Barium compounds can be rendered non-hazardous by reaction with excess sulfate to form insoluble barium sulfate. Any disposal practice must comply with local, state, and federal laws and regulations.

14. TRANSPORT INFORMATION

This product is not regulated as a hazardous material by the U.S. Department of Transportation.

Technical shipping name: Barium compound

Freight Class - Package: Inorganic Chemical.

Product Label: Barium Chloride Solution.

Poison Inhalation Hazard: No

Environmental hazards: Not a Marine pollutant.

15. REGULATORY INFORMATION

OSHA Status: This product is hazardous under the criteria of the Federal OSHA Hazard Communication Standard, 29 CFR 1910.1200. It is classified as toxic based on the oral rat LD50.

TSCA Status.....: Listed on TSCA Inventory as ACTIVE

CERCLA Reportable Quantity..... : None.

SARA Title III:

Section 302, Extremely Hazardous Substances....: None.
Section 311/312, Hazard Categories.....: Category 1 (Acute Hazard).
Section 313, Toxics Release Inventory: Barium Compounds, Code N040.

RCRA Status: If discarded in its purchased form, this product would be a hazardous waste by characteristic. Under RCRA, it is the responsibility of the product user to determine, at the time of disposal, whether a waste containing the product, or derived from the product, should be classified as a hazardous waste under 40 CFR 261.20-24.

16. OTHER INFORMATION

NFPA Rating (National Fire Protection Association):

- Health - 2** (Materials which on intense or continued exposure could cause temporary incapacitation or possible residual injury unless prompt medical attention is given.)
- Fire - 0** (Materials which are nonflammable).
- Reactivity - 0** (Materials which in themselves are normally stable even under fire exposure conditions, and which are not reactive with water).
- Special - NA**

Reason for Issue..... : Review and reapproval.

Prepared by..... : Jerry A. Cook.

Title..... : Technical Director.

Approval Date..... : February 25, 2023

Supersedes Date..... : August 4, 2021.

MSDS Number..... : 42B.
